

Agency Priority Goal | Action Plan | FY 2023 – Q1

Data-Informed Diplomacy

Goal Leader:

Matthew Graviss, PhD – Chief Data Officer

The U.S. Department of State aims to ...

The Department's global workforce will be empowered with the skills and tools to derive actionable mission insights from data, and its data assets will be securely shared and effectively managed. By September 30, 2023, in alignment with the eight implementation themes of its first-ever Enterprise Data Strategy, the Department will have doubled workforce training in data analytics, increased the use of enterprise analytics products by 50%, increased the number of organizational units leveraging common analytics infrastructure, quadrupled the ingestion of data assets into the Department's Data Inventory/Data Catalog, and published a modern enterprise data policy.

Goal Overview

Problem to Be Solved

- Data consumers across the Department of State need to be able to access trusted data in a timely manner to support decision-making.
- Some impediments are data literacy, access to data training, access to data assets, access to modern analytic platforms, secure data management and storage, and transparent and effective governance.

What Success Looks Like

- The Department of State's global workforce will be empowered with the skills and tools to derive actionable mission insights from data assets that are securely and effectively managed and utilized.
- The Department of State will enhance the data acumen of its global workforce and improve the tools and processes at its disposal to drive more effective data-informed decision making at all levels by enhancing its data discovery, access, and governance capabilities.

Goal target(s)

In the table below, please repeat the key metrics included in the goal statement (previous slide) that will be used to track progress.

Please update **this column** each quarter.

Achievement statement		Key indicator(s)	Quantify progress			Frequency
		A “key performance indicator” measures progress toward a goal target	These values enable us (and you!) to calculate % complete for <u>any</u> type of target*			When is there new data?
By...	We will...	Name of indicator	Target value	Starting value**	Current value	Update cycle
Q4 FY 2023	Increase data analytics trainings by 100%	Number of person-hours trained (includes full trainings, modules in larger non-data-specific trainings, FSI Courses, and online self-study courses)	8,400 person-hours per quarter (52,500 total person hours by the end of FY 2023)	4,200 person-hours per quarter	6,346 person-hours per quarter (37,420 person hours total)	Quarterly
Q4 FY 2023	Increase the number of uses of data and analytics products across the Department by 50%	Number of uses of data assets housed on Data.State Ecosystem. Uses is defined as user sessions and views for interacting with myriad data products across multiple platforms.	89,588 uses per quarter	59,725 uses per quarter	107,111 uses per quarter	Monthly
Q4, FY 2023	Reduce redundant infrastructure through more universally accessible and applicable data analytic tools.	Number of organizational units below the bureau/office level leveraging common Analytics infrastructure (Including but not limited to: Tableau, Azure, ArcGIS, databricks, etc.)	110	55	90	Monthly
Q4, FY 2023	Quadruple the number of data assets available on the Enterprise Data Inventory	Number of data assets available on data.state.sbu	520	129	253	Quarterly
Q2, FY 2022	Update Department data policy in the FAM.	Data Policy Update	1 – Complete	0 – Not Complete	1	N/A
Q3, FY 2022	Publish enterprise guidance on data policy and management via ALDAC or issue paper.	Data Policy and Management Guidance	1- Complete	0 – Not Complete	0	N/A

* Even qualitative targets! If the target is to achieve a qualitative outcome, quantify progress this way: 1=“Yes, we achieved it”, 0=“No, not yet”

** As of 10/1/2021

Goal Team

Cultivate a
Data Culture

Accelerate Decisions
through Analytics

Establish Mission-Driven
Data Management

Enhance Enterprise
Data Governance

The Office of Management Strategy & Solutions (**M/SS**) is the home of the Center for **Analytics (M/SS/CfA)**. Led by the Department's **Chief Data Officer (CDO)**, CfA is charged with improving the Department workforce's ability to leverage data as a strategic asset and more efficiently and effectively use data to inform decisions at all organizational levels and all over the world.

The **Communications, Culture, and Training (CfA/CCT)** team works to enhance employees' capacities to effectively use data for informed decision making through training (**FSI**), building a force of skilled data specialists, and fostering a culture of data and analytics enterprise wide.

The **Enterprise Analytics (CfA/Analytics)** team uses data and analytics to help solve mission and management challenges by advising, enabling, and partnering with entities across the enterprise.

The **Technology Modernization (CfA/Tech)** team is a hybrid organization that is aligned to both the CDO and the Chief Information Officer (**CIO**) in the **Bureau for Information and Resource Management (IRM)**. This team is continuously researching and developing tools that will make siloed information discoverable and interoperable.

The **Enterprise Data Management (CfA/EDM)** team is responsible for building the Department's capacity to inventory, align, govern, secure, and leverage data from across the enterprise. It is also charged with modernizing the Department's data policies and leading the execution of the Department's first-ever Enterprise Data Strategy.

Goal Strategies	Objectives	Indicators and Milestones	Impact
Cultivate a Data Culture: Train, incentivize, and recruit a workforce that routinely seeks, values, and fluently utilizes data for decision-making at all levels of the enterprise.	<ul style="list-style-type: none"> Strengthen Data Fluency Create a Data Culture that accepts multiple forms of evidence in decision making Enhance Data Collaboration Hire for the Future from existing vacancies 	<ul style="list-style-type: none"> Number of person-hours trained Count of Civil Service positions in data science job series (1560) Launch pilot program with external data analytics training platform Develop new discrete data and analytics training modules to include in existing internal training courses for civil servants, FSOs, and Senior Leadership. Develop and implement in partnership with industry, scalable data science training services via virtual training platforms. 	Increased data fluency empowers employees and decision makers to make data informed policy decisions that more effectively advance U.S. foreign policy priorities.
Accelerate Decisions through Analytics: Empower the Department’s global workforce to routinely utilize data by providing easy access to the Department’s data assets, modern analytics tools, and customer support services.	<ul style="list-style-type: none"> Deliver Analytic Products Provide Modern Analytic Tools and platforms Pilot and Scale Artificial Intelligence and Machine Learning Applications 	<ul style="list-style-type: none"> Number of organizational units below the bureau/office level leveraging common Analytics infrastructure Number of data assets available on Data.State Discover and catalog existing analytics products from other bureaus 	Providing the workforce with data tools and analyses enables evidence-based decision-making across mission and operational activities.
Establish Mission-Driven Data Management: Implement a common technical approach to effectively create, collect, store, protect, and share data across the Department and with the interagency and public.	<ul style="list-style-type: none"> Enable Access to Data Define Data Architecture Define and Implement Data Standards Establish Data Quality Program 	<ul style="list-style-type: none"> Number of uses of data assets housed on M/SS/CfA common infrastructure Officially launch Data.State, the Department workforce’s interface to the data inventory and data catalog Integrate campaign data assets from Management and Mission Themes 	Mission-driven data management improves the depth, breadth, and quality of analyses possible with the Department’s data, while making more efficient use of the resources needed for maintenance throughout its lifecycle
Enhance Enterprise Data Governance: Enable management oversight and coordination of Department data through effective stewardship, policies, process controls, and investment	<ul style="list-style-type: none"> Institute Data Governance Operating Model Develop Data Policy Measure the Organizational Value of Data and Analytics 	<ul style="list-style-type: none"> Data Policy Update Data Policy & Management Guidance Complete Data Campaigns 	Consistent practice of data governance throughout the Department enables Bureaus and Offices to manage, share, and use the Department’s data, while reducing the time and resources required to do so

Key Indicators

Indicator Title	Current Value	FY 2022 Target	FY 2023 Target
Mitigation			
Number of person-hours trained (includes full trainings, modules in larger non-data-specific trainings, FSI Courses, and online self-study courses)	37,420	22,050 hours	52,500 hours
Number of Civil Service positions designated as Data Scientist positions under job series 1560 and 0343*	21	N/A	50
Number of uses of data assets housed on M/SS/CfA common infrastructure. Uses is defined as downloads, user sessions, views, and other relevant methods for interacting with myriad data products across multiple platforms.	107,111	72,523	89,588
Number of organizational units below the bureau/office level leveraging common Analytics infrastructure (Including but not limited to: Tableau, Azure, ArcGIS, Databricks, etc.)	90	82	110
Number of data assets available on Data.State	253	260	520

*0343 is a cohort of data scientists the Department hired just prior to the creation of the 1560 hiring series. For additional information about this hiring please click [here](#).

Key Milestones

Milestone Summary

Key Milestone	Milestone Due Date <i>[e.g., Q2, FY 2017]</i>	Milestone Status <i>[e.g., Complete, On-Track, Missed]</i>	Owner <i>[optional column]</i>	Comments <i>[Provide discussion of Progress, changes from last update, Anticipated Barriers or other Issues Related to Milestone Completion]</i>
Officially launch Data.State, the Department workforce's interface to the data inventory and data catalog	Q1, FY 2022	Complete	MSS	Successfully launched Data.State; this is a necessary precursor to making data assets and tools more available to the Department workforce.
Launch pilot program with external data analytics training platform	Q2, FY 2022	Complete	MSS	Launched partnership with industry partner for data analytics training currently available to a subset of the Department and looking to expand in the upcoming months.
Develop new discrete data and analytics training modules to include in existing internal training courses for Civil Servants, FSOs, and Chiefs of Mission	Q3, FY 2022	On-Track	MSS/FSI	There is an ongoing partnership with SAIT to analyze impact of courses/knowledge gaps, including Needs Assessment to more closely align PS-315 course with Executive level data-related training requirements. M/SS/CfA will present during IRM Tradecraft, and discussions are under way to expand data training into other tradecraft areas.
Update Department data policy in the FAM	Q2, FY 2022	Complete	MSS	Department data policy was updated in FY23Q1 and is now in the FAM as the new volume 20 FAM: Data Policy.
Publish enterprise guidance on data policy and management via ALDAC or issue paper	Q3, FY 2022	Delayed	MSS	While enterprise guidance on data policy and management has been developed, it is pending final review and publication. We anticipate this will be complete by the end of FY23Q2.
Integrate campaign data assets from Management and Mission themes	Q4, FY 2022	Complete	MSS	Products that were created as part of the EDS Data Campaign efforts were inventoried and cataloged on Data.State.
Complete four data campaigns (two mission and two management) by end of FY2022	Q4, FY 2022	Complete	MSS	Strategic Competition, DEIA, Multilateralism, and Cyber Data Campaigns were completed successfully.
Develop and implement in partnership with industry, scalable data science training services via virtual training platforms	Q1, FY 2023	On-Track	MSS/FSI	Currently in pilot stage with industry partner.
Find and share to the existing enterprise analytics products from other bureaus	Q1, FY 2022 - Q4, FY 2023	On-Track	MSS	This is a recurring milestone. Completion status will be reassessed every quarter.
Integrate campaign data assets from Management and Mission themes	Q4, FY 2023	NA	MSS	
Complete four data campaigns (two mission and two management) by end of FY2023	Q4, FY 2023	NA	MSS	

Narrative – FY 23 Q1

I. Key Indicators (overview of quantitative indicators on slide 7)

Number of Person-Hours Trained. The cumulative number of person-hours trained in FY23 Q1 was 37,420 exceeding the target for the quarter and underscoring the success of the Department's continued expansion of data literacy offerings to the workforce.

Number of Organizational Units Leveraging Analytics Infrastructure. The cumulative number of organizational units leveraging common analytics infrastructure in FY23 Q1 was 90, slightly exceeding the target of 82.

Number of Data Assets: The cumulative number of data assets shared on the Department's data catalog in FY22Q4 grew to 253, however it fell short of meeting the target of 373. A combination of technical issues related to data ingestion and deprecation of expired data assets resulted in missing the target. The Department plans to revise its inventory process to improve the capture of asset metadata in FY23.

Number of Uses of Data Assets. With continued strong usage of enterprise products such as MAP 3.0, Data.State, and MRD, the Department saw 107,111 uses of its data assets, exceeding the FY23 Q1 target of 76,790.

Number of Data Scientist Positions. In FY23 Q1, the Department has acquired through hiring and conversion a total of 21 data scientists -- eight from the 01560-hiring series and 13 from the 00343-hiring series. We expect this number from both sources to grow in FY23, however, onboarding and conversion timelines may result in missing expected targets.

Note: The target value has been adjusted to 50 positions by the end of FY23 Q4 and the methodology for the Data Science Hiring indicator has been slightly modified. Specifically, this indicator now counts the 01560 hiring series *and* those that were hired just prior to the creation of it in the interagency data science hiring cohort under "00343 (Data Scientist)."

II. Key Milestones (overview of milestones due in FY23Q1 on slide 10)

Data Policy Update & Enterprise Guidance on Data Policy and Management (via ALDAC). Department data policy was updated in FY23 Q1 and is now in the FAM as a new volume, 20 FAM: Data Policy. Guidance in the form of a Department Notice and cable is anticipated to be completed by the end of FY23 Q2.

Scalable Data Science Training Services. The Department is continuing its pilot with an industry partner and will continue to assess scalability.

Existing Analytics Products from Other Bureaus. This is a recurring milestone. Completion status will be reassessed every quarter.

Data accuracy & reliability

Data Source	Accuracy	Reliability	Notes
<u>Goal Strategy #1: Cultivate a Data Culture</u>			
Foreign Service Institute Course Attendance	High	Med	Will be used to determine person-hours trained at Department-sponsored courses
M/SS/CfA Events Attendance Log	Med	High	Will be used to determine person-hours trained at Department-sponsored training events
Subscription-Based External Training Platform	High	High	Will be used to determine person-hours trained using third-party software
<u>Goal Strategy #2: Accelerate Decisions through Analytics</u>			
Enterprise Data Architecture	High	High	Will be used to determine the number of organizational units leveraging common infrastructure
Enterprise Data Inventory	High	High	Will be used to determine number of uses of data and analytics products
<u>Goal Strategy #3: Establish Mission-Driven Data Management</u>			
Data Inventory	High	High	Will be used to determine number of assets available
<u>Goal Strategy #4: Enhance Enterprise Data Governance</u>			
Foreign Affairs Manual	High	High	Will be used to determine if Department has updated its data policy
